

Lab Number : 01

Lab Title: GitHub Identity, Student Portal Registration, and Ubuntu Server Installation

Name: Saleha Taj

Registration no: FA24B1-SE-002

Course code: SE-665

Section: B

GitHub username: salehataj

Task 1: Create and Configure Your GitHub Account

Screenshot 1:

GitHub profile showing my profile name and username

Screenshot 2:

GitHub Public Profile showing my complete actual name

Task 2: Register in the Student Marks Portal

Screenshot 1:

Student Marks Portal login page

Screenshot 2:

GitHub profile information displayed inside the Student Marks Portal

Screenshot 3:

+ Enroll in another course

Submitted/pending enrollment in the Student Marks Portal

Task 3: Download VMware Workstation Pro and Ubuntu Server

Screenshot 1:

VMware Workstation Pro successfully running.

Screenshot 2:

ubuntu-26.04.1-live-server-amd64.iso	9/10/2026 5:46 AM	Disc Image File	2,859,240 KB
--------------------------------------	-------------------	-----------------	--------------

Downloaded Ubuntu Server ISO filename.

Screenshot 3:

Available storage showing at least 20 GB free space

Task 4: Create the Ubuntu Server Virtual Machine

1. New VM Wizard:

VMware New Virtual Machine Wizard.

2. Typical configuration:

Typical virtual machine configuration selected.

3. Ubuntu ISO selected:

Ubuntu Server ISO selected in VMware.

4. VM configuration summary:

Final Ubuntu Server virtual machine configuration.

5. Ubuntu boot screen:

```
[ OK ] Mounted snap-hwctl-123.mount - Mount unit for hwctl, revision 123.
[ OK ] Mounted snap-snapd-27710.mount - Mount unit for snapd, revision 27710.
[ OK ] Reached target snapd.mounts.target - Mounted snaps.
[ OK ] Reached target local-fs.target - Local File Systems.
[ OK ] Listening on systemd-sysext.socket. System Extension Image Management.
Starting apparmor.service - Load AppArmor profiles...
Starting console-setup.service - Set console font and keymap...
Starting finalrd.service - Create .time dir for shutdown pivot root...
Starting kdump-tools.service - Kernel crash dump capture service...
Starting netplan-config.service - Netplan Backend Configuration...
Starting plymouth-read-write.service - Plymouth To Write Out Runtime Data...
Starting systemd-binfmt.service - Set Up Additional Binary Formats...
Starting systemd-tmpfiles-setup.service - Create System Files and Directories...
Starting ufw.service - Uncomplicated firewall...
[ OK ] Finished console-setup.service - Set console font and keymap.
[ OK ] Finished finalrd.service - Create .runtime dir for shutdown pivot root.
[ OK ] Finished ufw.service - Uncomplicated firewall.
[ OK ] Finished plymouth-read-write.service - Plymouth To Write Out Runtime Data.
[ OK ] Finished systemd-tmpfiles-setup.service - Create System Files and Directories.
[ OK ] Finished kdump-tools.service - Kernel crash dump capture service.
[ OK ] Finished netplan-config.service - Netplan Backend Configuration.
[ OK ] Reached target network-pre.target - Preparation for Network.
[ OK ] Listening on systemd-networkd-resolve.socket. Network Management Resolve Hook Socket.
Starting systemd-networkd.service - Network Management...
```

Ubuntu Server installer boot screen.

Task 5: Choose the Installation Language:

Selected Ubuntu Server installation language.

Task 6: Configure the Keyboard Layout:

Selected keyboard layout.

Screenshot 2:

Selected keyboard variant.

Task 7: Choose the Ubuntu Server Installation Type

Screenshot 1:

Normal Ubuntu Server installation option selected.

Task 8: Configure the Network

Screenshot 1:

Ubuntu Server detected network interface.

Screenshot 2:

```
NAME      TYPE  NOTES
[ ens33   eth   -           ▶ ]
DHCPv4    192.168.100.128/24
DHCPv6    -
00:0c:29:86:df:4a / Intel Corporation / 82545EM Gigabit Ethernet Controller (Copper) (PRO/1000 MT Single Port Adapter)
```

Ubuntu Server network interface showing assigned IP address.

Task 9: Configure Storage

Screenshot 1:

Guided storage option selected.

Screenshot 2:

Ubuntu Server storage configuration.

Task 10: Select the Installation Disk

Screenshot 1:

Selected VMware virtual disk.

Screenshot 2:

USED DEVICES

DEVICE	TYPE	SIZE
[/dev/sda	local disk	20.000G ▶]
partition 1	new, BIOS grub spacer	1.000M ▶
partition 2	new, to be formatted as ext4, mounted at /	19.997G ▶

Ubuntu virtual disk name and size.

Task 11: Review the Partitions

Screenshot 1: Proposed Ubuntu partition layout

Proposed Ubuntu partition layout.

Task 12: Confirm the Storage Changes

Screenshot 1:

Final storage warning.

Screenshot 2: Storage changes confirmation

Task 13: Configure the Ubuntu Profile

Screenshot 1: Ubuntu profile showing complete actual name

Profile configuration [Help]

Enter the username and password you will use to log in to the system. You can configure SSH access on a later screen, but a password is still needed for sudo.

Your name:

Ubuntu profile showing complete actual name.

Screenshot 2:

Profile configuration [Help]

Enter the username and password you will use to log in to the system. You can configure SSH access on a later screen, but a password is still needed for sudo.

Your name:

Your servers name:
The name it uses when it talks to other computers.

Ubuntu server name set to ubuntu

Screenshot 3:

Pick a username:

Ubuntu username matching GitHub username

Screenshot 4:

Profile configuration

[Help]

Enter the username and password you will use to log in to the system. You can configure SSH access on a later screen, but a password is still needed for sudo.

Your name:

Your servers name:
The name it uses when it talks to other computers.

Pick a username:

Choose a password:

Confirm your password:

[Done]

Completed Ubuntu profile setup.

Task 14: Complete the Software Installation

Screenshot 1:

```
Installing system [ Help ]

executing curtin install partitioning step
curtin command install
configuring storage
  running 'curtin block-meta simple'
  curtin command block-meta
  removing previous storage devices
  configuring disk: disk-sda
  configuring partition: partition-0
  configuring partition: partition-1
  configuring format: format-0
  configuring mount: mount-0
executing curtin install extract step
curtin command install
  writing install sources to disk
  running 'curtin extract'
  curtin command extract
    acquiring and extracting image from cp:///tmp/tmpe74_1nk1/mount
configuring keyboard
curtin command in-target
executing curtin install curthooks step
curtin command install
  configuring installed system
  running 'curtin curthooks'
  curtin command curthooks
    configuring apt configuring apt
    installing missing packages
    configuring iscsi service
    configuring raid (mdadm) service
    configuring NVMe over TCP
    installing kernel
    setting up swap
    apply networking config
    writing etc/fstab
    configuring multipath
    updating packages on target system
    configuring pollinate user-agent on target
    configuring kernel crash dumps settings
    final kernel configuration
    configuring target system bootloader
    installing grub to target devices
    copying metadata from /cdrom
final system configuration |
```

[View full log]

Ubuntu Server software installation progress.

Task 15: Reboot and Verify the Ubuntu Identity

Screenshot 1:

Ubuntu installation complete screen.

Screenshot 2:

Ubuntu login screen.

Screenshot 3:

```
Welcome to Ubuntu 26.04.1 LTS (GNU/Linux 7.0.0-31-generic x86_64)

* Documentation:  https://docs.ubuntu.com
* Management:    https://landscape.canonical.com
* Support:       https://ubuntu.com/pro

System information as of Fri Sep 11 05:35:24 AM UTC 2026

System load:  0.02               Processes:            207
Usage of /:   32.0% of 19.51GB   Users logged in:     0
Memory usage: 14%               IPv4 address for ens33: 192.168.100.129
Swap usage:   0%

Expanded Security Maintenance for Applications is not enabled.

6 updates can be applied immediately.
To see these additional updates run: apt list --upgradable

Enable ESM Apps to receive additional future security updates.
See https://ubuntu.com/esm or run: sudo pro status

The programs included with the Ubuntu system are free software;
the exact distribution terms for each program are described in the
individual files in /usr/share/doc/*/copyright.

Ubuntu comes with ABSOLUTELY NO WARRANTY, to the extent permitted by
applicable law.
